

Isover

Sustainable Building - The ISOVER Multi-Comfort House

Live comfortably - Save natural resources

The ISOVER Multi-Comfort House ...

- derives from the passive house concept (leading to bioclimatic design)
- is sustainable, taking into account environmental, economic and social factors
- provides the best thermal comfort and related energy savings
- offers excellent acoustic and visual comfort, indoor air quality, fire protection and safety
- allows high flexibility in building design - outside and inside

... and is core element of ISOVER's Sustainable Development Strategy.

Saint-Gobain Isover CZ s.r.o.
